

CID Capital, founded in 1981, is a leading provider of private equity to lower-middle market companies throughout the United States. The firm is comprised of two business groups actively managing private equity and venture capital funds which together total nearly \$400 million and are invested in a variety of industries.

The Private Equity Group of CID Capital buys controlling interests in privately held lower middle market companies that are transitioning from entrepreneurial firms to professionally managed enterprises. The focus is on high quality companies facing constraints on growth that can be removed by CID. Specific investment criteria include
